PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience in full-stack and backend development, building web applications and RESTful APIs using Node.js, JavaScript, React, Go, and Rust. Experienced with PostgreSQL, MongoDB, Docker, and microservices through professional internships and personal projects. Strong understanding of backend architecture, API integration, database-driven applications, and clean, maintainable code. Quick to learn new technologies and comfortable working independently or collaboratively in fast-paced development environments.

EDUCATION

Kyungpook National University <i>B.Tech in Computer Science & Engineering (Double Degree)</i> GPA: 3.52/4.3	Daegu, South Korea	2024–2026
Christ (Deemed to be) University <i>B.Tech in Computer Science & Engineering</i> GPA: 3.56/4.0	Bangalore, India	2022–2027

TECHNICAL SKILLS

Languages	Rust, Go (Golang), Python, JavaScript, Java, C, SQL, HTML, CSS, JSX
Frameworks	Docker, Docker Compose, Node.js, React, Next.js, Actix Web, Tailwind CSS, RESTful APIs
Databases	PostgreSQL, MongoDB, Linux, JSON File Databases
Competencies	Backend Architecture, Microservices Design, Vulnerability Assessment, Cross-Cultural Teamwork

PROFESSIONAL EXPERIENCE

Backend Development Engineering Intern , Hifx	Kochi, Kerala, India	January 2025 – February 2025
- Engineered modular, scalable backend workflows in Go (Golang), implementing clean RESTful API structures with clear separation of concerns across service layers. - Containerised enterprise microservices using Docker and Docker Compose, improving deployment automation, environment reproducibility, and developer onboarding speed.		
Cybersecurity Analyst Intern , T Sanct	Kochi, Kerala, India	April 2024 – May 2024
- Monitored open-source threat intelligence feeds and dark-web forums, identifying and cataloguing security vulnerabilities and indicators of compromise relevant to client infrastructure. - Synthesised structured risk-intelligence reports detailing exploit patterns and recommended mitigation protocols, cross-referencing findings with CVE databases and threat actor TTPs.		

TECHNICAL PROJECTS

Blog Site	JavaScript · Node.js · JSX · CSS · PostgreSQL
Blog website built with JavaScript , HTML , and CSS , using Node.js as the server, JSX/CSS for the frontend, and PostgreSQL as the database.	
Point of Sale (POS) System	Rust · Actix Web · React · Tailwind CSS · PostgreSQL · MongoDB
App to record store sales with a Rust/Actix backend, React/Tailwind frontend, and a hybrid PostgreSQL/MongoDB database.	
Multi-Lingual Chat Bot	Python · HuggingFace · Mistral AI
Chatbot that can converse in multiple Indian languages, Built using python and Mistral 7B Model, from hugging face	
Terminal Password Manager	Rust · Native Cryptography
Terminal-based password manager in Rust using proper encryption with a master key derivation scheme; the master key is never stored to disk.	
Nutri Scan AI	Rust · Next.js · Alibaba Cloud Qwen API · JSON
Uses Alibaba Cloud's Qwen multimodal model to retrieve nutritional information about meals, with a Rust backend, Next.js frontend, and JSON file as a temporary database.	
RAG Based Chatbot	Python · RAG · Qwen 2.5 · Streamlit
A Chatbot made using a RAG architecture, developed in Python , and UI built using Streamlit
